

Orangetown Pediatrics

Boston Children's Health Physicians

Until every child is well™

Welcome to Orangetown Pediatrics! We are thrilled to meet you and your family.

We want to take this opportunity to tell you a little bit about our practice.

We have a robust medical team consisting of doctors, nurse practitioners, a physician assistant, a lactation consultant, a dietician, a social worker, nurses, scribes, and medical assistants. We do our best to provide a range of services under the Orangetown Pediatrics roof, however, we are affiliated with most of the pediatric sub-specialists at Maria Fareri Children's Hospital in Westchester for more complicated care.

We received our Patient-Centered Medical Home designation, and we work hard to provide comprehensive medical and mental health care. We do rapid in-house lab testing for Strep, Influenza, and RSV. We do finger prick hemoglobin, lead, cholesterol, and glucose testing. For send out labs, our nurses and MA's draw blood in the office.

We see walk-in same day sick appointments from 8:00-9:00 am Monday through Friday (please note we do not accept walk-ins on weekends), and same day sick visits by appointment throughout the day. We ask that you call us before going to urgent care in the evening as many illnesses can be managed by phone overnight with a follow-up walk-in appointment first thing the next morning.

There is a lot of pediatric medical information on our website, as well as weight based dosing for over the counter medications including acetaminophen, ibuprofen, and benadryl. Our vaccine schedule as well as the vaccine information sheets can be found there. We also have well visit handouts from the American Academy of Pediatrics for your reference. We encourage you to read them in advance of your visit so you can ask us any specific questions you may have.

We have a patient portal where you can view your child's visit summaries. Completed school forms will be uploaded there, and families can also request medication refills on any active prescriptions.

We have a Facebook page where we post health information as well office as related news we want to share with families. We encourage all patients to follow us on Facebook.

We do our best to exceed your expectations during each visit to your office. We hope we achieve that goal!
