Boston Children’s Hospital’s Division of Endocrinology is one of the world’s leading centers dedicated to caring for children and adolescents with acute and chronic endocrine and metabolic illnesses. As one of the largest pediatric endocrinology practices in the country, our expert team of doctors, nurses and caregivers provides state-of-the-art diagnosis, treatment and management for children who suffer from diabetes, growth problems, obesity or other disorders of the endocrine system.

Endocrinology

Joel Hirschhorn, MD, PhD  
Chief

David Breault, MD, PhD  
Associate Chief

Highlights
- Ranked no. 2 by U.S. News & World Report for 2018-2019 in pediatric endocrinology
- Seven specialty programs and clinics
- 32,000 visits
- 50 clinicians, basic science, clinical and translational researchers

Areas of Expertise
Our team evaluates and treats a wide range of conditions, including:
- Acquired and congenital hypothyroidism
- Adrenal disorders
- Diabetes insipidus
- Diabetes mellitus (types 1 and 2)
- Disorders of sexual differentiation
- Endocrine complications of cancer therapy
- Gender identity disorders
- Glycogen storage disease
- Growth disorders
- Hyperthyroidism (Graves disease)
- Hypo- and hypercalcemia
- Hypoglycemia
- Hypopituitarism
- Metabolic bone diseases (rickets, osteoporosis)
- Obesity
- Pheochromocytoma
- Pituitary tumors
- Polycystic ovary syndrome
- Prader-Willi syndrome
- Precocious and delayed puberty
- Premature adrenarche
- Premature thelarche
- Syndrome of inappropriate antidiuretic hormone secretion
- Thyroid nodules and thyroid cancer
Clinical Programs

**Behavioral Health, Endocrinology, and Urology (BE-U) Program**
Evaluates, provides medical treatment, discusses surgical options, and offers psychosocial support for infants, children and adolescents with differences/disorders of sex development (conditions that affect development of the genitals). Our interdisciplinary team includes endocrinologists, nurses, psychologists, social workers, urologists, and other specialists as needed.
617-355-4367 | bostonchildrens.org/endocrine

**Bone Health Program**
Provides comprehensive evaluation of children and adolescents with frequent fractures, low bone density, disorders of calcium and vitamin D metabolism and genetic disorders of the skeleton including bone density testing, x-ray and laboratory evaluation.
617-355-7476 | bostonchildrens.org/bone

**Diabetes Program**
Provides diagnosis, diabetes education and self-management training and long-term multidisciplinary, comprehensive follow-up care of patients with diabetes mellitus (types 1 and 2), as well as other forms of diabetes — such as cystic fibrosis-related diabetes mellitus, steroid-induced diabetes and other disorders of carbohydrate metabolism.
617-355-8136 | bostonchildrens.org/diabetes

**Gender Management Service**
Performs psychological evaluation, including testing, and discusses medical options for transgender and gender-diverse children, adolescents, and young adults. Our multidisciplinary team includes endocrinologists, nurses, psychologists, social workers, and other specialists as needed. An in-depth assessment is provided to help patients and families make decisions about hormonal therapy and/or surgery.
617-355-4367 | bostonchildrens.org/gems

**General Endocrinology Program**
Provides comprehensive diagnosis, treatment and management of children with a wide variety of endocrine disorders, including problems with growth, puberty, and hypoglycemia, as well as disorders of the thyroid, pituitary, adrenals, gonads, and other endocrine systems. Through the use of state-of-the-art diagnostics, symptoms of endocrinology disorders can be picked up early and medical intervention can be started as soon as possible.
617-355-7476 | bostonchildrens.org/endocrine

**Neuroendocrinology/Childhood Cancer Survivor Programs**
Provide comprehensive diagnosis and treatment of endocrine disorders related to hypothalamus and pituitary region tumors, as well as the endocrine effects of treatments for malignancies and hematologic disorders. Our care is coordinated with that of oncologists, hematologists, neurosurgeons, neurologists and geneticists.
617-355-7476 | bostonchildrens.org/endocrine

**Optimal Weight for Life Program**
Offers care delivered through a multidisciplinary team approach for children who are overweight or obese. The OWL experience includes a comprehensive medical evaluation, dietary guidance from a nutritionist focused on a “low glycemic load” eating plan to stabilize blood sugar and insulin levels, and behavior modification strategies from a psychologist to support lifestyle changes. OWL exercise programming and resource coordination is also available.
617-355-8226 | bostonchildrens.org/owl

**Thyroid Program**
Provides diagnosis, treatment and management of children with all types of thyroid disease, including thyroid nodules and thyroid cancer, hyperthyroidism, and hypothyroidism. Our program is distinguished by its expertise in thyroid imaging, thyroid surgery, radiiodine therapy, and the long-term care of children with thyroid cancer. Our multidisciplinary team includes specially trained pediatric endocrinologists, surgeons, oncologists, radiologists, and pathologists.

Research
The Division of Endocrinology is investigating the genetic and biochemical underpinnings of the standard endocrine system and endocrine disorders. The team is exploring:

- Causes of and treatment for type 1 and type 2 diabetes and their complications
- New dietary treatments for obesity
- Pathogenesis of and treatment for leptin resistance in diabetes and obesity
- Pathogenesis of obesity related cancers
- The role of gastric bypass in the treatment of obesity
- New obesity genes that point to novel therapies
- Identification of adult stem cells in the endocrine system and their therapeutic use and role in endocrine disorders
- Directed differentiation of stem cells to treat endocrine disorders
- Pathogenesis of and treatment for adrenal disorders
- The role of thyroid hormone metabolism in disease

Training
Our Fellowship Program in Pediatric Endocrinology provides comprehensive clinical and research training over three years. Boston Children’s residents have voted the Division of Endocrinology’s educational program among the best in the hospital. Our trainees also benefit from relationships with world-class clinical teachers and researchers at renowned surrounding institutions including Harvard Medical School and the Joslin Diabetes Center.
