The First Annual Tommy Fuss Center Research Symposium
Tommy Fuss Center for Neuropsychiatric Disease Research

“Conceptualizing the Influence of Rare Genetic Variation on Early Onset Mental Illness”

In an effort to spur scientific discourse and discovery, the Tommy Fuss Center for Neuropsychiatric Disease Research will host a seminar dedicated to better understanding how rare genetic events influence liability for mental illness, particularly with childhood or adolescent onset. This seminar will include presentations from internationally renowned speakers on the interplay between psychiatric disorders and rare genetic mutations.

Wednesday, September 18, 2019  |  8:30 am to 12:00 pm
Folkman Auditorium, Boston Children’s Hospital, 300 Longwood Ave, Boston MA 02115

Carrie Bearden, Ph.D.
