

Service Awards 2004

EACH YEAR, CHILDREN'S HOSPITAL BOSTON HONORS EMPLOYEES AND STAFF WHO HAVE WORKED AT THE HOSPITAL FOR A MULTIPLE OF FIVE YEARS. The Service Awards recognize the dedicated employees who, each day, contribute to Children's tradition of excellence in pediatric care, research, training and service to the community. Congratulations to all who reached a service milestone in 2004.

Robert Masland, MD, Adolescent/Young Adult Medicine 50 Years

Dr. Robert Masland has been an outstanding faculty member at Children's Hospital Boston since 1954, serving as chief of Adolescent/Young Adult Medicine from 1967 to 1993. Robert has mentored innumerable students, residents, fellows and faculty members who have become leaders in Adolescent Medicine. He has been critical to the pediatric residency selection committee at Children's

and was chair of the Selection Committee from 1983 to 2002. He has also served as the co-director of the Combined Harvard Medicine/Pediatrics Training program. In addition to his contributions at Children's, Robert has been active at Harvard Medical School as a member of the Curriculum Design Group for the Life Cycle course and the Admissions Committee. He has also served as associate master for the Cannon Society since 1993 and as a senior fellow.

Bill Wright, Real Estate and Planning

45 When Bill Wright started at Children's as a co-op student from Charlestown High School, some people weren't sure whether he was a patient or an employee. A licensed electrician, he has moved up through the ranks, from electrician to electric shop foreman. After his first decade here, he moved to project management, where he now serves as a director, guiding millions of dollars of repairs, infrastructure and renovations that support and advance the hospital's mission. Over the years, in his scarce free time, he has been on Children's bowling and softball teams, refereed youth hockey and taken up golf with a vengeance. He recently drove a ball into a tree, and two balls fell out—a great return on investment. It's that kind of productivity he brings to all he does. Good humored, dedicated, caring, Bill is a critical member of our Facilities Management team, and we congratulate him on his 45 years of service.

Carolyn Clausen, RN, CICU

40 In the movie "It's a Wonderful Life," a comment stands out that describes Carolyn and her loyalty and dedication to this hospital. When describing the Savings and Loan Association, they say, "Peter Bailey is the Savings and Loan." For those of us who know Carolyn our sentiment would be similar, "Carolyn Clausen is Children's Hospital Boston." Carolyn has spent her entire nursing career at Children's and epitomizes the quintessential employee. She has touched the lives of numerous children and families and continues to be a source of strength for them.

Kathryn Scott, RN, Patient Relations

40 Everyone knows Kitty anywhere she goes. For 40 years, she has been serving patients and their families here at Children's, and her dedication and true love for this hospital has shown through. If you walk through the halls with Kitty, you don't make it but a few feet before she is saying a "good morning" or getting the day's update from someone. She truly has a connection with staff in every area of this hospital, from housekeeping to heart surgery. Kitty has woven a web throughout the hospital—one that is intricate and supportive to all.

Teofila Estremera, Martha Eliot Health Center

25 Teofila (Tata) Estremera has worked as a medical assistant in Pediatrics at MEHC for more than two decades, earning the accolades and appreciation of the clinicians she supports as well as the peers she trains. She is an unusually sensitive and community-oriented staff member, who has grown to know the patients and parents through the years so well that her observations and suggestions are highly valued by the physicians. Outside of work, she is an active member and contributor within her church community and extended family, both in Boston and Puerto Rico.

Mary Ellen Pierce, 35 years

Judah Folkman, MD, Vascular Biology Program

35 Dr. Judah Folkman is an extraordinary surgeon, scientist and colleague. Internationally recognized as the founder of the field of angiogenesis, his discoveries of the mechanism of angiogenesis opened a field of investigation that has led to clinical trials of angiogenesis inhibitors in the U.S. and Europe. Largely because of Judah's research, the possibility of anti-angiogenic therapy is now changing the practice of how cancer and many non-neoplastic diseases are treated. In addition to his distinguished accomplishments in research, Judah has served as a surgeon and teacher. He is a professor of Cell Biology at Harvard Medical School and currently director of the Vascular Biology Program at Children's. Here at Children's, his professional "home," Judah is most appreciated as a generous and supportive mentor, a dedicated and committed teacher, a brilliant and unflappable clinician, and a generous and loyal colleague.

John (Jack) O'Neill, Materials Management

30 Jack is one of the famous O'Neill trio. Brothers Kevin and Jim also have long tenures at Children's, and Jack with his 30 years of service, ranks among the elite. Jack, as many others at the hospital, has seen many changes take place over the course of his career. He has endured through thick and thin and has excelled in his career path. Jack has been in a leadership role in the department for many years and has contributed to the efficient and smooth operation of the distribution end. Jack's commitment and dedication to his job have not gone unnoticed. Though not often said, Jack's faithfulness to his job is much appreciated by all. His diligence makes life a lot easier for others to work along side.

Lyle Micheli, MD, Orthopedic Surgery

30 Dr. Lyle Micheli is a pioneer in pediatric sports medicine and has been a member of the Department of Orthopedic Surgery for the past 30 years. Locally, he is well-known for his expertise in the prevention of athletic injuries in children, as well as the care of athletic-related injuries. He is the chief of our Division of Sports Medicine. He has been past president of national organizations related to sports medicine and has been in charge of the Governor's Council on Physical Fitness in Massachusetts. He can be seen at the finish line of the Boston Marathon providing medical care to runners, and has been instrumental in the care of inner city athletes with emphasis on the Reggie Lewis Athletic Center. Lyle is an outstanding clinician, teacher and researcher devoted to Children's, as well as young athletes everywhere. Congratulations to him for 30 years of service in the Department of Orthopedic Surgery.

Sandra Fenwick, Chief Operating Officer

5 Many of you probably recognize Sandi Fenwick, Children's chief operating officer (COO), because she is one of the most visible leaders the hospital has had in its 136-year history. Sandi epitomizes the Children's spirit. She's intelligent, committed and compassionate. Sandi came here in 1999 as the senior vice president of Business Development, Strategy and Ambulatory Care. By the end of the year, she was promoted to COO, and shortly thereafter, the previous CEO resigned, and Sandi became the most senior hospital administrator while a new CEO was being recruited. It was a tough year to take charge—the hospital culminated six years of losses with an \$80 million operating loss. Sandi worked with her leadership team to develop a recovery plan that today has led Children's to a financial turn around.

The amazing part of the success story is that Sandi championed this financial recovery while working with her new CEO, Dr. James Mandell, to improve employee morale and convince Children's Board of Trustees to invest in two new buildings—The Karp Family Research Laboratories and our soon-to-be-opened Clinical Building Expansion.

Many of you may not know that Sandi was planning a career in medicine and was taking pre-med classes in college when she was recruited to run a research project in Saudi Arabia, where she met her husband. She then went to work at Beth Israel Medical Center, and for the next 23 years rose through the ranks and eventually became a senior vice president at Care Group. While she left a piece of her heart at the BI, we know her heart is big enough to fill the halls of Children's. We are fortunate to have such an experienced, caring and loyal employee at our helm.
