

# Celebrating our scribes

Children's Hospital Boston's doctors are a talented lot: Many of them are also published authors. Below is just a sampling of their recent work. You'll find these books and others by Children's writers in the hospital library on Farley 1.

## **Touchpoints: Birth to Three** *Your Child's Emotional and Behavioral Development* by T. Berry Brazelton, MD, and Joshua Sparrow, MD

Brazelton's bestselling book for parents, *Touchpoints: Birth to Three*, has been newly revised and updated. In the second edition, world-famous pediatrician Brazelton and psychiatrist Sparrow address issues that today's families face, including co-sleeping, the latest in toilet training, obesity prevention and choices in childcare. Since the first edition, scientific advances have begun to confirm the connections between the behavioral advancements and regressions that Brazelton observed in his research and upon which the Touchpoints model is based.

## **Clinical Manual of Pediatric Psychosomatic Medicine** *Mental Health Consultation with Physically Ill Children and Adolescents* co-written by David DeMaso, MD

As co-author of this new manual with Richard Shaw, MD, DeMaso, psychiatrist-in-chief, explores the mental health of physically ill children, including emotional and behavioral issues associated with illness. Topics range from mood, anxiety and somatoform disorders to pediatric pain, psychopharmacology, family therapy and preparation for procedures.

## **Charles A. Janeway** *Pediatrician to the World's Children* co-written by Fred Lovejoy, MD

Lovejoy, deputy chair of the Department of Medicine, and University of Rochester Medical Center pediatrician Robert Haggerty, MD, recently teamed up to write a new biography of Children's former Physician-in-Chief **Charles Janeway, MD**. The book chronicles the renowned doctor's efforts on the local, national and international levels to improve the health and lives of children.

## **The Peanut Allergy Answer Book** by Michael Young, MD

In this newly revised edition, Young, of the Allergy and Immunology Division, provides updates on the current research on peanut allergy, a life-threatening condition whose incidence has doubled in young children in the past five years. New approaches to treatment, vaccines and preventive strategies are reviewed in a user-friendly question and answer format for both families and health care providers.

## **The Cancer Treatment Revolution** *How Smart Drugs and Other New Therapies are Renewing Our Hope and Changing the Face of Medicine* by David Nathan, MD

Nathan, our former physician-in-chief and a huge supporter of Children's, examines the history of cancer research and explains the newest treatments that are saving thousands of lives. Written for the general public, his book offers insight into the cancer battle from both the doctors' and patients' perspectives.

## **Child Health in America** *Making a Difference through Advocacy* by Judith Palfrey, MD

In her new book, Palfrey, who is chief of General Pediatrics, explores the role that advocacy plays in improving child health. From teachers and parents to health care providers and community agencies, this book guides all potential advocates on how they can make a difference in children's lives.

## **Ending the Food Fight** Guide Your Child to a Healthy Weight in a Fast Food/Fake Food World by David Ludwig, MD, PhD

In his first book, Ludwig, who is director of the Optimal Weight for Life Clinic, gives dietary advice that he hopes will help stem the tide of childhood obesity. The book offers healthful recipes and tips on how parents can help their children make better eating decisions. Ludwig includes an outline of his nine-week, low-glycemic diet plan and suggestions on making physical activity fun.
