

# Craniofacial Anomalies Program

The Craniofacial Anomalies Program at Children's Hospital Boston provides a team approach to the evaluation, diagnosis and treatment of children and adults with congenital or acquired facial deformities.

## Our Team

Our program is staffed by an experienced team of clinicians, all with specialized training in the care of children with craniofacial anomalies. Each year we treat more than 500 patients, 250 of them new patients, making our program one of the most experienced in the country.

Our team includes specialists in:

- audiology
- dentistry
- neurosurgery
- nursing
- oral and maxillofacial surgery
- plastic surgery
- speech and language pathology

We also work closely with pediatric specialists in:

- genetics
- otolaryngology
- psychology
- psychiatry
- social Work

## Areas Of Expertise

Some of the conditions that we treat include, but are not limited to:

- Apert syndrome
- craniosynostosis
- Crouzon syndrome
- deformational plagiocephaly
- encephalocele
- hemifacial microsomia
- microtia
- Moebius syndrome
- Pfeiffer syndrome
- plagiocephaly
- Pierre Robin sequence
- Saethre-Chotzen syndrome
- Treacher Collins syndrome
