

Neurology Observerships Guidelines

- Observers need to be medical school graduates
- If the potential observer is still in medical school, they must apply for a clerkship rotation via the HMS registrar - <http://www.hms.harvard.edu/registrar/aServices/xClerk.html>
- Observerships are limited to one month
- We do not sponsor visas
- Depending on how many observers are accepted per month, we may not be able to accommodate all requests
- David Urion, MD is the Neurology observership coordinator
