Laboratories of Cognitive Neuroscience Winter 2009 Newsletter

Hello from Dr. Nelson

Hello from the Labs of Cognitive Neuroscience! I hope you all enjoyed a wonderful holiday season. It has been an exciting time for us as we are finally settled into our expanded space here at 1 Autumn Street, which includes a new testing space. As always, we have many study participation opportunities for all ages. Please feel free to explore our [website](#) or contact our research team for more information about studies that you or your child might participate in.

Whether you have already taken part in our studies or have recently joined our growing participant registry, I greatly appreciate your interest in our research. Your support of our work and participation in our studies is invaluable to us in answering many important questions related to infant and child cognitive development.

Warm Wishes,

Charles A. Nelson, Ph.D.

Director of Research, Division of Developmental Medicine

Richard David Scott Chair in Pediatric Developmental Medicine Research

Professor of Pediatrics and Neuroscience, Harvard Medical School

The LCN on Facebook!

With the new year (and the new decade!) we decided we ought to get with the times and make ourselves a Facebook page. We will post all kinds of fun info to the page, including study updates, new findings from our research, and information about events in which the labs are participating. It will be a wonderful way to keep in touch with all of you about new studies and lab happenings and hopefully a great way to spread the word!

To find us on Facebook and become an LCN fan, just search for Labs of Cognitive Neuroscience at Children's Hospital Boston!

The LCN at Boston Children's Museum!

For those of you who may not always have time to come into lab during the week, you can now find us at Boston Children's Museum every Saturday! Dr. Margaret Sheridan will be there with some fun memory studies for children ages 4 and up. Look for her at the end of the main hallway on the third floor!

In the Community

Visions of Community: A Conference for Families of Children with Special Needs and the Professionals Who Serve Them Saturday, March 13th, 8:30-5:00.

For the second year, the LCN will have a table at this conference, which gathers together families and professionals to discuss a wide array of issues, including everything from special education law to financial planning. For more information on the conference schedule and topics, please visit the FCSN [website](#).

Calling all Stay-at-Home Dads!

We are still looking for infants with a male primary caregiver for our study, "The Other Gender Effect"! If you are a stay-at-home dad with a baby under one year of age, you and your baby might be eligible to participate. You can read more about the study [here](#).

If you or someone you know might be interested, please contact Eliza Congdon:
