Boston Children’s Hospital’s Allergy and Immunology Program is widely recognized as a leading center for the evaluation and treatment of children with allergic disorders and immunodeficiencies. Our program is one of the most experienced of its kind, caring for more than 11,600 children each year from communities throughout New England. Allergists across the world refer their patients with complex, rare immunodeficiencies for evaluation and second opinions.

**Areas of expertise**

Our team evaluates and treats a range of conditions, including:
- Allergies
- Anaphylaxis
- Angioedema
- Asthma
- Atopic dermatitis (eczema)
- Drug allergy
- Food allergies
- Immune deficiency
- Mastocytosis
- Recurrent infections
- Rhinitis (hayfever)
- Urticaria

Eosinophilic Gastrointestinal Disease Program
Multidisciplinary clinic dedicated to caring for children and adolescents with eosinophilic gastrointestinal diseases.
617-355-6058 | childrenshospital.org/egid

Immunology Program
Provides evaluation and treatment for children with various types of immune system disorders.
617-355-6117 | childrenshospital.org/immunology

Research
The Division of Immunology has a large basic research laboratory for the analysis of the causes and of potential treatments for allergic and immunological disorders. In addition, we are engaged in a number of clinical research studies designed to evaluate the effectiveness of new treatments.
