This collection of art was made for our patients, by our patients, and made possible by the Artists-in-Residence of the Creative Arts Program.

The very act of coloring can be a form of meditation. Making art helps to distract and concentrate on something positive.

Coloring in the lines is not required.

Our Mission:
The Creative Arts Program at Boston Children’s Hospital provides engaging, innovative, and uplifting experiences that support an integrated approach to care for the many diverse families and communities we serve.

Creative Arts Program
Since 1996 the arts have been used at Boston Children’s to enhance physical and emotional healing, transform the hospital environment, and provide opportunities for expression.

Our Programs
- Artist-in-Residence
- Music Therapy
- Child Life Art Cart
- Art Parties
- Concert Series
- Art Galleries
- Touring Exhibitions
- Volunteer Art Programs
- Museum Partnerships (MFA Boston and ICA Boston)
- Collaborations with local artists, camp programs, and arts organizations

For any questions about the Creative Arts Program, contact Miranda Guardiani, Creative Arts Program Administration Manager, at arts@childrens.harvard.edu or call (617) 355-7506.

COLOR IN THE
MANDALA
drawn by: Gianna, age 12
Mandala Instructions:

Mandala is a meditation symbol that literally means “circle.” Mandalas can be found in many cultures. Concentration on its form can help relaxation just by letting your eyes follow the circular design.
