

Longwood
PEDIATRICS, LLP

FIVE YEARS

Name _____

Date _____

Weight _____

Height _____

Body Mass Index _____

Office Hours: We are available 24 hours a day, 365 days a year!

- Monday-Friday: 8:30am-5:30 pm (later as needed to accommodate urgent visits)
- Saturdays and Holidays: 9am-12pm (later as needed to accommodate urgent visits) – Urgent visits only
- Sundays: Mornings (office times vary) – Urgent visits only

Telephone Coverage: Longwood Pediatrics has 24-hour telephone coverage.

Please ALWAYS call us before going to any emergency room.

- Monday-Friday: 8:30am-5:30pm – to schedule appointments or leave a message for the nursing staff. This is the best option for general medical questions and to make appointments.
- Saturdays, Sundays, and Holidays: 9am – 12pm to schedule an urgent appointment – please call early in the day.
- After regular business hours: After hour calls are answered by well-trained pediatric nurses who follow protocols approved by Longwood Pediatrics. Please restrict calls to urgent medical issues only.

Appointment Scheduling:

- Well Visit/Checkups: Our schedules are open one year in advance for routine well visit appointments. **Schedule next year's well visit, today!**
- Sick Visits: It is best to call the office early in the day to schedule an appointment. If you are not sure that your child needs to be seen, you may leave a message for our nursing staff and a nurse will call you back the same day.

Communication:

We encourage all families to use MyChart, our patient portal. With MyChart you are able to communicate with your child's provider through messaging, book appointments, see your child's medical history and more. Sign up at the front desk today!

BRIGHT FUTURES HANDOUT ► PARENT

5 AND 6 YEAR VISITS

Here are some suggestions from Bright Futures experts that may be of value to your family.

✓ HOW YOUR FAMILY IS DOING

- Spend time with your child. Hug and praise him.
- Help your child do things for himself.
- Help your child deal with conflict.
- If you are worried about your living or food situation, talk with us. Community agencies and programs such as SNAP can also provide information and assistance.
- Don't smoke or use e-cigarettes. Keep your home and car smoke-free. Tobacco-free spaces keep children healthy.
- Don't use alcohol or drugs. If you're worried about a family member's use, let us know, or reach out to local or online resources that can help.

✓ FAMILY RULES AND ROUTINES

- Family routines create a sense of safety and security for your child.
- Teach your child what is right and what is wrong.
- Give your child chores to do and expect them to be done.
- Use discipline to teach, not to punish.
- Help your child deal with anger. Be a role model.
- Teach your child to walk away when she is angry and do something else to calm down, such as playing or reading.

✓ STAYING HEALTHY

- Help your child brush his teeth twice a day
 - After breakfast
 - Before bed
- Use a pea-sized amount of toothpaste with fluoride.
- Help your child floss his teeth once a day.
- Your child should visit the dentist at least twice a year.
- Help your child be a healthy eater by
 - Providing healthy foods, such as vegetables, fruits, lean protein, and whole grains
 - Eating together as a family
 - Being a role model in what you eat
- Buy fat-free milk and low-fat dairy foods. Encourage 2 to 3 servings each day.
- Limit candy, soft drinks, juice, and sugary foods.
- Make sure your child is active for 1 hour or more daily.
- Don't put a TV in your child's bedroom.
- Consider making a family media plan. It helps you make rules for media use and balance screen time with other activities, including exercise.

✓ READY FOR SCHOOL

- Talk to your child about school.
- Read books with your child about starting school.
- Take your child to see the school and meet the teacher.
- Help your child get ready to learn. Feed her a healthy breakfast and give her regular bedtimes so she gets at least 10 to 11 hours of sleep.
- Make sure your child goes to a safe place after school.
- If your child has disabilities or special health care needs, be active in the Individualized Education Program process.

5 AND 6 YEAR VISITS—PARENT

✓ SAFETY

- Your child should always ride in the back seat (until at least 13 years of age) and use a forward-facing car safety seat or belt-positioning booster seat.
- Teach your child how to safely cross the street and ride the school bus. Children are not ready to cross the street alone until 10 years or older.
- Provide a properly fitting helmet and safety gear for riding scooters, biking, skating, in-line skating, skiing, snowboarding, and horseback riding.
- Make sure your child learns to swim. Never let your child swim alone.
- Use a hat, sun protection clothing, and sunscreen with SPF of 15 or higher on his exposed skin. Limit time outside when the sun is strongest (11:00 am–3:00 pm).
- Teach your child about how to be safe with other adults.
 - No adult should ask a child to keep secrets from parents.
 - No adult should ask to see a child's private parts.
 - No adult should ask a child for help with the adult's own private parts.
- Have working smoke and carbon monoxide alarms on every floor. Test them every month and change the batteries every year. Make a family escape plan in case of fire in your home.
- If it is necessary to keep a gun in your home, store it unloaded and locked with the ammunition locked separately from the gun.
- Ask if there are guns in homes where your child plays. If so, make sure they are stored safely.

Safety for Your Child

Did you know that injuries are the greatest threat to the life and health of your child? Injuries are the leading cause of death of school-aged children. **Yet you can prevent most major injuries!**

At age 5, your child is learning to do many things that can cause serious injury, such as riding a bicycle or crossing a street. Although children *learn quickly*, they still cannot judge what is safe. You must protect your child. You can prevent common major injuries by taking a few simple steps.

Bike Safety

Your child should always wear a helmet when riding a bike. Buy the helmet when you buy the bike! **Make sure your child wears a helmet every time he or she rides.**

A helmet helps prevent head injuries and can save your child's life.

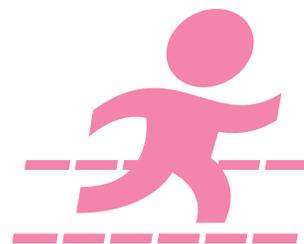

Never let your child ride a bike in the street. **Your child is too young to ride in the street safely.**

Be sure that the bike your child rides is the right size. Your child must be able to place the balls of both feet on the ground when sitting on the seat with hands on the handlebars. Your child's first bicycle should have coaster brakes. Five-year-olds are often unable to use hand brakes correctly.

Street Safety

Your child is in danger of being hit by a car if he or she darts out into the street while playing. Take your child to the playground or park to play. Show your child the curb and **teach him or her to always stop at the curb and never cross the street without a grown-up.**

Water Safety

Now is the time to teach your child to swim. Even if your child knows how to swim, **never let him or her swim alone.** Teach your child how to turn upright, float, tread water, and get to safety.

Do not let your child play around any water (lake, stream, pool, or ocean) unless an adult is watching. The adult must be supervising closely and continuously without distractions like reading or using a phone. *Never* let your child swim in canals or any fast-moving water.

Teach your child to never dive into water unless an adult has checked the depth of the water. **And when your child is on any boat, be sure your child is wearing a Coast Guard-certified life jacket.**

American Academy of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN®

Fire Safety

Household fires are a threat to your child's life, as well as your own. **Install smoke alarms on every level** in your house, especially in furnace and sleeping areas, and **test the alarms every month**. It is best to use smoke alarms that use long-life batteries, but if you do not, change the batteries once a year.

Teach your child not to play with matches or lighters, and keep matches and lighters out of your child's reach. Also, do not smoke in your home. Many home fires are caused by a lit cigarette that has not been put out completely.

Car Safety

Car crashes are one of the **greatest dangers** to your child's life and health. The crushing forces to your child's brain and body in a crash or sudden stop, even at low speeds, can cause severe injuries or death.

To prevent these injuries, correctly use a car safety seat or belt-positioning booster seat and seat belt every time your child is in the car. Your child should use a car safety seat with a harness until he reaches the seat's upper weight limit or his ears come to the top of the seat; then he should use a belt-positioning booster seat. Your child is not big enough to fit in the adult seat belt yet. **The safest place for all children to ride is the back seat**. Set a good example. Make sure you and other adults buckle up too!

Firearm Hazards

Children in homes where guns are present are in more danger of being shot by themselves, their friends, or family members than of being injured by an intruder. Even if your child is taught never to touch a gun, if there is a gun in the house a child's curiosity can lead to severe injury or death. It is best to keep all guns out of the home. Handguns are especially dangerous. If you choose to keep a gun, keep it unloaded and in a locked place, with the ammunition locked separately. Ask if the homes where your child visits or is cared for have guns and how they are stored.

Would you be able to help your child in case of an injury? Put emergency numbers by or on your phone today. Learn first aid and CPR (cardiopulmonary resuscitation). Be prepared...for your child's sake!

Ten Tips for Your Child's Success in School

It should come as no surprise that success — or failure — at school starts at home. Studies have linked poor academic performance to factors such as a lack of sleep, poor nutrition, obesity, and a lack of parental support.

The good news is that those same studies also show higher test scores for students who live in homes where healthy habits, regular routines, and good communication exist. How can you ensure your child heads off to school this fall with the best possible foundation? Follow these 10 tips and watch your child thrive.

Enforce Healthy Habits

You can't perform well when you don't feel good. To help your child have the best chance at doing well in school, make sure she follows healthy habits at home. Choose a bedtime that will give your child plenty of sleep, and provide a healthy breakfast each morning. Encourage exercise, and limit the amount of time she spends watching TV, playing video games, listening to music, or using the computer.

Stick to a Routine

Most kids thrive on structure and will respond well to routines that help them organize their days. In our house, for example, my son gets dressed, makes his bed, and eats breakfast while I make his lunch and pack his school bag with completed homework and forms. When he gets home in the afternoon, I serve him a snack and he does his homework while I prepare dinner. Your routines may differ, but the key is to make it the same every day so your child knows what to expect.

Create a “Launch Pad”

Veteran parents know it's important to have a single place to put backpacks, jackets, shoes, lunchboxes, and school projects each day. Some call it a “launch pad,” while others call it a “staging area.” Our area is a hook by the back door.

Whatever you call it, find a place where your child can keep the items he needs for school each day and keep him organized. Then you'll know right where to find everything during the morning rush.

Designate a Space

At school your child has a desk or table where she works. There is plenty of light, lots of supplies, and enough room to work. Why not provide her with the same type of environment for homework? A designated homework space often makes it easier and more fun for children to complete assignments at home. A desk is great, but a basket of supplies and a stretch of kitchen counter work just as well.

Read, Again and Again

It is often said that children spend the first several years learning to read, and the rest of their lives reading to learn. The written word is a gateway to all kinds of learning, and the more you read to your child, the better chance he has of becoming a proficient and eager reader.

Try to sit down with your child to read a little bit every day, give him plenty of opportunities to read out loud to you, as well, and above all have fun. While the importance of reading with your child cannot be stressed enough, it should not be the cause of stress.

Learn Always

Your child may be past the preschool years, but home education is still a critical part of his overall learning experience. “Some of the attitude recently is that it’s up to the schools and teachers to figure it all out, to make sure children are learning and healthy and safe,” says Barbara Frankowski, M.D., MPH, FAAP, and member of the AAP Council on School Health. “There’s only so much teachers can do. Parents have to fill in with good support at home.”

Look for ways to teach your child throughout the day. For example, cooking combines elements of math and science. Use the time when you make dinner as an opportunity to read and follow directions, to discuss fractions, to make hypotheses (“What will happen when I beat the egg whites?”), and to examine results.

Take the Lead

Children learn by example. Let your kids “catch” you reading. Take time to learn a new skill and discuss the experience with them. Sit down and pay bills or do other “homework” while your kids do their schoolwork.

If you display a strong work ethic and continually seek out learning opportunities for yourself, your kids will begin to model that same behavior in their own lives.

Talk Often

Do you know how your child feels about her classroom, her teacher, and her classmates? If not, ask her. Talk with her about what she likes and doesn’t like at school. Give her a chance to express her anxieties, excitements, or disappointments about each day, and continue to support and encourage her by praising her achievements and efforts.

Show Interest

Don’t limit your support to your child; extend it to her teachers as well. Meet the teachers and stay in regular contact by phone or e-mail so that you can discuss any concerns as they arise. Not only will it pave the way for you to ask questions, but it will also make the teachers more comfortable with calling you if they have concerns about your child.

Expect Success

Perhaps the most important way you can support your child’s efforts at school is to expect him to succeed. That doesn’t mean that you demand he be the best student or the best athlete or the best artist. Rather, let him know that you expect him to do “his best” so that he’ll be proud of what he can accomplish.

If you make that expectation clear and provide a home environment that promotes learning, then your child will have a greater chance of becoming the best student he can be.
