

Where the world comes for answers

## The Boston Combined Residency Program and the Alumni Association Proudly Announces the 2022 Recipients of

### The Susan Brooks Award

The Susan Brooks award is given annually to a resident and a faculty or administrative staff member who has shown exemplary services to his or her patients, colleagues, and the Boston Combined Residency Program community, and is the utmost example of service leadership within the residency program, just as Susan was for so many years.

This year's recipients are:

#### Jessica Angerman

Jess Angerman came to the Boston Combined Residency Program after graduating from the University of Michigan where she majored in General Studies with a focus in Informatics. She is originally from Long Island, NY. While at Michigan, she played collegiate women's lacrosse and participated in advisory committees amongst Student Athletes. After graduating from Michigan in 2017, she moved to Boston as an Administrative Associate in Pediatrics and eventually took on the role of BCRP Scheduling Coordinator. As Scheduling Specialist, Jess has had the opportunity to present at the 2020 virtual HIMSS Machine Learning & AI for Healthcare event with CHIME on "Transforming Burnout Culture and Operational Efficiency with AI-Optimized Provider Scheduling". While living in Boston, Jess also spent time coaching Division 3 lacrosse at Emerson College. She enjoys reading, spending time with family and friends, and traveling back to Ann Arbor for football games. Jess and her dog Fitzgerald (Fitz) currently live in Champaign, IL where she works remotely and is enrolled in the Masters of Health Informatics Program at Northwestern University.

#### Kieleley Chapman, MD

Kieleley grew up outside of Syracuse, NY. She studied Social Anthropology at Harvard College where she captained the Harvard Club Lacrosse Team, directed a sexual assault crisis hotline, and led a tutoring program for teens in Mission Hill. During a gap year prior to medical school at Mount Sinai, she co-founded and ran a private tutoring service focused on high school girls headed for STEM or medicine careers. During medical school, she provided nutrition counseling for patients with chronic disease at a free-clinic in Harlem, served as co-President of Medical Students for Haiti, a student-run initiative to increase emergency first responder capacity in Haiti, and worked in a lab developing novel therapies for metastatic prostate cancer. As a categorical resident in the BCRP, Kieleley has continued to demonstrate a commitment to service. She established a partnership between Boston Medical Center and a local meal delivery service; this partnership provides free, medically tailored meals to patients and families and is aimed at reducing pediatric food insecurity, obesity, and malnutrition. She has also stood out for her exceptional commitment to the BCRP community and wellness, from spreading holiday cheer through residency emails and snacks, hosting a multitude of Funuary events, organizing T-shirts for Olympics, and hosting a match day celebration. Next year, Kieleley will be a fellow in GI at Boston Children's Hospital with a focus on nutrition equity and implementation of nutritional based-interventions for disease prevention and treatment.

**We congratulate and commend the service and care of Jess and Dr. Chapman!**
