**Nutrition**

**Action Plan**

- **Eat thoughtfully**
  - Meat and dairy are big contributors to greenhouse gas emissions, by incorporating plant-based meals into your diet you can improve both your health and the planet!
  - Support local farms and businesses
  - Sustainable diets are both good for the Earth, your community, and your health

- **Limit waste**: Excess food production contributes to greenhouse gas emissions. Try meal prepping, donating to local pantries, and composting to reduce your impact

- **Screen for nutritional deficiencies**: Discuss your child’s diet, growth, and eating habits with your pediatrician

---

**Did you know?**
Climate change impacts the foods that are available, how much it costs, and how nutritious it is. As extreme weather impacts farming, changes in our ability to access healthy foods impacts how children grow and develop.
