

Repository Core for Neurological Disorders

❖ Objective: To Enroll Patients with Neurologic Conditions

- With or Without Known Diagnosis
- Unknown Molecular Genetic Etiologies

❖ Matched Clinical Data and Biological Samples for the Future Research of You and Your Colleagues

How do you refer a patient?

- *Simply* contact **Marti Goldenberg**, Research Coordinator for the Repository Core for Neurological Disorders.
 - Page, email, and/or call when you have a patient for her to talk with and she will do *the rest*.

What will the Repository do?

- Collect **data and samples** that will be available for you and others for future research projects.

Samples are ideally collected for patients and parents, if available.

- Either **blood or saliva** for DNA-based specimens with other sample types optional
