

Apps Used to Refine Motor Movements:

In order to use some communication tools, certain motor movements are required (e.g. precise point, swiping, tapping). Apps can be used to engage in certain motor movements, multiple times, within one motivating context (e.g. music app, game app, etc.). *Note: This handout is meant to be a resource, not meant to be an exhaustive list.*

<p>AlphaBaby</p> 	<input checked="" type="checkbox"/> Touch <input checked="" type="checkbox"/> Swipe <input type="checkbox"/> Drag <input checked="" type="checkbox"/> Refined Point
